

# Data4 innovations for « low carbon data center »

Based on several years of R&D, Data4 has implemented **sustainable initiatives** for the design of its data centers in 2023

## #01

Since 2022, Data4 delivered the first data center with **low carbon foundation**

## #02

Data4 continues to roll out **low-carbon hollow slab**

The implementation of **all the Ecodesign guidelines** including low carbon concrete solutions, have already led to a reduction of **13% of the carbon footprint of each new MW IT build.**
