Arjun and Interogo acquire significant stake in European data centre portfolio owned and operated by Data4

Data4, European data center champion, accelerates its leadership position in digital infrastructure with support of new strategic investors, Arjun and Interogo.

Paris, August 1st 2025 - Data4, the leading European data centre owner and operator announces the investment of Arjun Infrastructure Partners (“Arjun”) and Interogo Holding in its stabilised data centre portfolio ("StableCo"). **This portfolio includes hyperscale data centers located in Paris, Milan and Madrid, with a combined contracted capacity of 244 MW, serving as critical digital infrastructure in three of Europe’s most connected markets.** In line with the accelerating development of the digital economy and AI, **this transaction provides strategic capital to accelerate Data4’s growth**, with a focus on developing next-generation hyperscale data center campuses in high-demand, tier-one European markets.

The investment from Arjun and Interogo signals a clear endorsement of Data4’s strategy to operate campuses across key European markets, as well as the expertise of its highly experienced team, which will continue to manage and operate these sites to ensure operational continuity and alignment with long-term value creation strategy.

Data4 and Brookfield, together with this additional backing, will accelerate deployments across existing and new markets, **further strengthening the company’s position as the region’s foremost data-center champion.**

Olivier Micheli, CEO of Data4, commented:

“We are pleased to broaden our investor base with the addition of Arjun and Interogo as new shareholders. **This strategic investment underscores strong confidence in Data4’s fundamentals and serves as a clear validation of its international expansion and digital campus development model.** Backed by this partnership, Data4 strengthens its position as the **European data center champion.**”

About Data4

Data4 is a leading European data center operator and investor, specialized in designing, building, and operating state-of-the-art facilities across strategic markets in Europe. The Group has pioneered a next-generation campus model that is ultra-connected, resilient, and sustainable, enabling long-term digital growth for its customers.

Offering scalable and secure hosting solutions, from a single rack to entire dedicated buildings, Data4 supports the evolving IT infrastructure needs of hyperscalers, cloud providers, telecom operators, and enterprise clients.

Through its Data4Good program, the Group takes a proactive and structured approach to sustainable development, built around four core pillars: environment, people, local communities, and governance.

Data4 operates some of Europe's most advanced data center campuses, with exceptional land and energy reserves unmatched in the market. Its sites in France, Italy, Spain, Poland, Germany, and Greece host leading international cloud players, major telcos, and innovative tech companies.
